REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The cited prior art fails to teach the claimed invention alone or in a combination.

The invention as claimed is computer implemented method of assembling a document comprising the steps of: (a) initializing or opening in a memory of a computer a document having at least one live data field; (b) initializing a record in the memory for each live data field, each record storing an attribute or property of data received in the corresponding live data field; (c) inserting data into a first live data field or amending data in the first live data field; and (d) inserting data into a second live data field or amending the data in second live data field to include the data inserted into or amended in the first live data field based on the attributes or properties of the data stored in the records of the first and second live data fields.

The cited prior art teaches loading the document from the memory and inserting data into variable field, which is equivalent to claimed live data field. However the cited prior art fails to specifically teach inserting data into second live data field to include data inserted or amended into first live data field **based on the attributes or properties of the data stored in the records of the first and second live data fields.** The cited prior art simply modifies the data in all the documents based on variable data modification but fails to specifically take into account attributes or properties of both live data fields as claimed. Therefore the invention is allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanjiv D. Shah whose telephone number is (703) 305-8355. The examiner can normally be reached on M-F 9-5:30.
